

Spreadsheet Application

Prof. Jonathan Lee (李允中)

Department of Computer Science and
Information Engineering
National Taiwan University

Homework 1: Requirements Statements₁

- ❑ In a spreadsheet application,
 - A spreadsheet object, bar chart object, and pie chart object can depict information in the same application data object by using different presentations.
 - When the user changes the information in the spreadsheet, the bar chart reflects the changes immediately, and vice versa.

Homework 1: Requirements Statements₂

- Both a spreadsheet object and bar chart object can depict information in the same application data object by using **different presentations**.
